

Object Oriented Programming

Lab Project Proposal

Name: Md. Mahmudul Hasan ID: 011 152 185 Section: I

Project Name: Event Scheduler

Project Type: Java Application

Main Idea: Will input all of my event and at the given time a notification will pop on the screen .

Description:

All of events will be added to the app. This app will save the events in database using SQLite. So on the given time a notification will pop on the screen. This app will always stay on, it will automatically start when the pc is power on.

Additional Functionalities:

There will an option for updating an event and delete an event.
